EDUCATION

McGill University

Bachelor of Arts in Software Engineering, Minor in Psychology

Montreal, QC

Expected Dec 2027

EXPERIENCE

Software Engineer Intern

May 2026 – Aug 2026

Applied Invention

Cambridge, MA

- Transferred CI/CD ownership of 18 repositories serving 30 engineers from in-house Gitlab and CI/CD server to partner Sensei Ag's enterprise cloud, provisioning Kubernetes runners with Terraform and Terragrunt
- Cut per-repo migration from hours to minutes with zero deployment interruption by scripting the cutover, halving 10 CI templates to 5 and replacing runner SSH keys with scoped job tokens (Bash, Docker BuildKit)
- Eliminated silently skipped irrigation cycles in production greenhouse valve control by replacing instantaneous evaluation with a restart-safe scheduler persisting per-zone cycle state (Python, SQLite, Kubernetes)
- Restructured conveyor layout hierarchy and MQTT topic routing across 2 greenhouse sites with a manifest-driven tool generating reviewable migration plans from live data (Python, FastAPI, MQTT)
- Prototyped grow strategy editor replacing hand-edited JSON with a drag-and-drop stage timeline, interactive target graphs, and pre-export validation (TypeScript, React, Vite, D3)

Software Development Engineer Intern

June 2025 – Aug 2025

Amazon Web Services

New York, NY

- Developed data explainability dashboard serving fulfillment billing items for the 6000 largest AWS contracts to customer support and bill computation teams (Java, AWS Lambda, React, DynamoDB, S3, SQL, TypeScript)
- Reduced on-call workload by 10 hours per week with 70% decrease in customer data tickets by surfacing monthly billing snapshots engineers previously queried by hand (SQLite, S3, Bash)
- Provisioned dashboard backend in TypeScript CDK: DynamoDB, API Gateway, S3, and chained Lambdas

Software Development Engineer Intern

May 2024 – Aug 2024

Amazon Web Services

New York, NY

- Created backend service (AWS Lambdas) to manage out-of-cycle billing items for invoices totaling \$4B/year
- Simplified data ingestion from automatic and manual flows to one automated stream to deliver invoices days faster and increase cash flow by more than \$10M/year (Java, TypeScript, Bash)
- Increased unit test coverage to greater than 90% across 3 packages with Mockito and JUnit, created test utilities

PROJECTS

McHacks Dev Team Lead and Full Stack Dev | github.com/hackmcgill

Oct 2023 – Present

- Led 7 developers across 3 repositories serving 3k users/year for McGill's largest hackathon (600 participants)
- Built applicant dashboard and shipped *mchacks.ca* redesigns in 2 weeks, 2 years running (React, NodeJS)
- Automated participant operations spanning 40k emails/year, applicant statistics, sponsor tools, and judging

myExtracurriculars - Hack McWiCS | devpost.com/myex-tracurriculars

Feb 2026

- Designed club recruitment platform with application tracking and a RAG advising chatbot (React, MongoDB)
- Won Crowd Prize and Best Use of MongoDB Atlas

SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, C, C++, Bash

Infrastructure: Terraform, Terragrunt, Kubernetes, Docker, GitLab CI/CD, AWS Lambda, S3, Oracle Cloud, MQTT

Frameworks and Databases: React, Vite, NodeJS, FastAPI, D3, DynamoDB, MongoDB, SQLite

LEADERSHIP

McGill Computer Science Undergraduate Society

Apr 2025 – Apr 2026

President

Montreal, QC

- Elected by 2k CS students to lead 27 executives and a \$45k budget, delivering 48 initiatives in 1 year
